**What?**

Script to be used on a YT video to compel restaurant owners to use the feature, "EventPlanner."
You can see the video by clicking on the image at the foot of the document.

**Script**

*"Sorry, but we picked another Spot for our company event… graduation party… bridal shower …rehearsal dinner…"*

After personally speaking with 100s of owners...I get how frustrating hearing this can be… especially when you **know** you would have done a **great** job for them...(you would have been the **perfect** place....)

*Let's end the frustration - I'll show you how you can turn twice as many inquiries into confirmed bookings… get more event inquiries… how to cut no-shows…*

Customers want to work with the Spot who can ensure them they have the right space…vibe… menu… service… for occasions like a 25+ guest company bash (where they plan to splash the cash)... their birthday… rehearsal dinner…

…and the Spot that gets back to them **quickly with all the info they need to easily make a decision…**

*… becomes odds-on favorite to land the booking!*

*But when you're managing the floor during a rush… ordering supplies… reviewing sales reports, accounting, paperwork… you can't drop everything you're doing to respond quickly… professionally… and include all the important info… <u>for every single inquiry</u>!*

EventPlanner means you can automatically respond to all your inquiries (before they contact another restaurant)… sending tailored proposals that make the customer feel heard… reassuring them that you'll exceed expectations and care about their event…

*… and ALL of this is contained within your SpotHopper and EventPlanner software!*

*So even the most inexperienced AGM or events coordinator can send perfectly tailored info packets with just one click… helping customers pick you…!*

*Filling your calendar has never been as simple!*

How do we know?

1000s of other restaurant owners (nationwide) told us what a **game changer** this is!

And here's how to unlock these tools and increase the number of special occasions… customers enjoying themselves at **your** restaurant!
